

ASP .NET (CS 204)

Lab 1: HTML

Practice Question 1

Create an HTML document that displays the following:

- A heading saying "Introduction to Web Development".
- A paragraph that explains what HTML is and why it is important.
- A blockquote that quotes a famous developer's statement about the importance of learning HTML.
- Add a line break after the blockquote and insert a thematic break to separate the content.

Bonus: Style the paragraph by wrapping certain key terms in strong or em tags to emphasize them.

Practice Question 2

Create an HTML page that includes the following:

- A heading that says "HTML Lists".
- An unordered list of any three web development technologies.
- An ordered list of the steps to create a basic HTML document.
- A nested list where an unordered list of "Frontend" and "Backend" frameworks is added inside the ordered list.

Bonus: Add the logo of HTML (available as HTML.png) at the top of the page.

Practice Question 3

Create a small HTML document that demonstrates the following:

- A description list that explains three HTML elements: Paragraphs, Headings, and Blockquotes.
- Include a preformatted text section that shows an example of an HTML code snippet with proper indentation.
- After the preformatted text, add a line break followed by a thematic break.
- At the end of the document, add a nested list with an unordered list of "Frontend Technologies" and an ordered list of the top three most popular frontend frameworks within it.
